Springfield Street Directory.

The Street Directory gives the location of each street, and shows what other streets, avenues, or places run from or across it, with the number at which they intersect.

From this list the location of any number on a street can be easily ascertained. As, for instance, wishing to know at what part of Main street No. 310 comes, turn to Main street, and you find that Worthington street intersects at 298, right side, and Bridge street at No. 340, showing that No. 310 comes on the right side of Main street between Worthington and Bridge.

THE CURTIS REGULATOR CO.,

NELSON CURTIS, Agent.

STEAM and WATER PRESSURE REGULATORS, STEAM TRAPS,

AND OTHER SPECIALTIES FOR STEAM HEATING.

OFFICE AND MANUFACTORY, 53 BEVERLY ST. BOSTON, MASS.

CURTIS
Balanced Steam Trap.

NET PRICE LIST.

Condensing Capacity in Feet of One-Inch Pipe.

No. 1.	4,000 ft., 3-4 in. Valve,	.	$30.00
No. 2.	7,000 ft., 1 in. Valve,	.	$40.00
No. 2 1-2.	10,000 ft., 1 1-4 in. Valve,	.	$55.00
No. 3.	15,000 ft., 1 1-2 in. Valve,		$75.00
No. 4.	26,000 ft., 2 in. Valve,	.	$100.00
No. 5.	40,000 ft., 3 in. Valve,	.	$125.00

GLASS WATER GAUGE, $4.00 EXTRA.

SOME POINTS OF SUPERIORITY OVER OTHER TRAPS.

1. Large discharging capacity, as the area of valve is equal to pipe connections.
2. The very small amount of leverage required to open discharge valve, the same being so nearly balanced with the pressure on both seats.
3. A clear, open passage from the inside of float into the atmosphere, thus giving free vent from interior of float of all condensation in the float.
4. The very small amount of room these traps occupy for the large amount of condensation they are capable of looking after, and the great simplicity of the entire apparatus.
5. The float has great lifting power; is made of hard composition; is perfectly round, and is the strongest float made against collapsing.

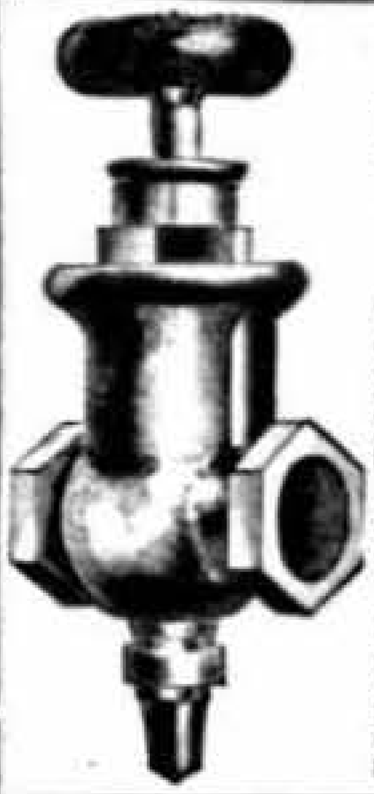
These traps having balanced valves, work equally well under a low or high pressure. We have some working under 150 lbs. pressure, and some on 1 lb.

GENERAL AGENCIES.

No. 109 Liberty St., New York.
No. 2035 North Front St., Philadelphia
No. 218 Lake St., Chicago.
No. 220 S. Third St., Minneapolis.

THE
CURTIS
PATENT
Return Steam
TRAP.

AUTOMATICALLY returns the water of condensation from any surface **INTO THE BOILER.** It will return the water from **LOW PRESSURE** circulation into a high **PRESSURE** boiler. **IT IS NOISELESS, POSITIVE, SIMPLE AND DURABLE.**



THE CURTIS
PRESSURE REGULATOR
For Steam and Water.

This valve contains a novel combination of old and established principles, is made **ENTIRELY OF METAL**; occupies the same space as a globe valve, for the same size pipe, is a lock valve, is very simple and sensative.

It has no glands, or packing, and the seat may be made of any suitable material for steam, water or any other gas or fluid.

It is used on **STEAM HEATING APPARATUS, DRYERS, SLASHERS, JACKET KETTLES OF ALL KINDS, AIR AND WATER PUMPS, ETC.**, and, in fact, everywhere that air, steam or water needs to be controlled automatically.

WHAT WE CLAIM FOR IT.

1. It will fully control the outlet valve on a change of temperature of five degrees. 2. The outlet valve has an area nearly equal to the area of the connecting pipes. 3. It will discharge **air** as freely as water, and remove **large quantities** of air as fast as the steam will displace it. 4. Any trap will work from 1 to 100 pounds pressure. 5. It is **small, simple, durable** and **accessible.**

FIRE ALARM TELEGRAPH.

Instructions to Key Holders—Key holders, upon positive information of a fire, will unlock the box, and, if the bells or the small bell in the box is not striking, pull the hook down to the end of the slide once and let go immediately. Do not strike an alarm when the bells or the small bell in the box is striking, for in that case the alarm is already striking, and to give a second one would confuse the firemen. After giving an alarm, remain, if possible, until the steamers arrive, to direct them to the fire. If you hear no clicking sound in the box after pulling the hook, go to the next box, and give the alarm from that.

Do not give an alarm for a fire at a distance, *nor for a burning chimney.* Do not strike the alarm more than once from the same box. Be sure the box is locked before you leave it.

Bible studies are followed by all the students, and those having the ministry in view are offered special advantages for the study of theological subjects. The college is on the same footing as other New England colleges and has power to confer the ordinary academic degrees. The officers of the college are: President, Rev. Calvin E. The executive committee, with the treasurer, meets on the first Tuesday of each month. The object of this association is the improvement of the religious, intellectual, social, and temporal welfare of women in this city, especially of young women. On the 22d of October, 1878, a boarding-home for young ladies was opened to the public and proved to be more of a success than the ladies hardly dared to hope, even in their most enthusiastic moments. So great was the progression of public favor, as manifested in the demand for more commodious quarters, that, during the year 1879, the boarding-home, 27 Vernon street, was erected, which was subsequently abandoned when on May 1, 1885, the new boarding-home, No. 19 Bliss street, was opened. It can accommodate about fifty boarders. With the attractive parlors, the piano (which is free for the use of all the inmates), books, daily and weekly papers and periodicals (furnished by kind friends), with the pleasant social gatherings, and the daily evening gatherings of the family for their devotional exercises, consisting of reading the Scripture, prayer, and singing, no young lady can long be an inmate of the home and be indifferent to its kind and loving atmosphere. Prices for board and room range from $3 25 to $5 per week, according to location of room. Table board alone, $3 per week; transients, $1 per day or $5 per week. Ladies residing in other places, on coming to the city to trade, find the "Home" an excellent place to obtain meals and rest. Application for admission to the boarding-home may be made to the matron or to any of the following committee on admission to the home: Mrs. J. H. Carmichael, 41 Maple street; Mrs. J. M. The work began by establishing a day nursery in 1883; to this was added an employment registry in 1885, and a laundry and provident dispensary in 1886. The house now occupied was purchased in 1886 by the subscriptions of individuals desirous of promoting this form of charity work. Home for Friendless Women and Children—These two institutions were formerly conducted under one roof at No. 62 Union street, a corporation for this purpose having been organized in 1865, by ladies interested in the reform of fallen women, the relief of the needy, and the care of destitute children. The number of inmates increased so rapidly, however, that in the course of a few years it became necessary to provide another establishment, and in 1871 the Home for Children was built on Buckingham street; since which time the house on Union street has been used for the reception of adults only, or for mothers with infants.

The institutions have continued under the direction of the same corporation, which is composed of 60 ladies, representing all the different religious societies of the city.

The government of this institution is vested in a board of managers, consisting of 30 ladies chosen annually by the corporation, from their own number, the board having power to fill their own vacancies during the year. An advisory committee of 7 gentlemen is appointed by the corporation, with whom the Board of Managers consult on all difficult or doubtful questions.

A meeting of the Board of Managers is held at the Homes alternately, once in two weeks, on Friday afternoons, notice of which is always given in the morning paper of that date.

The annual meeting of the corporation is held on the fourth Wednesday in January, the special time and place being determined by the Board of Managers. The officers for the present year are as follows: President, Mrs. Heman Smith; Vice-Presidents, Mrs. Eli H. Patch, Mrs. Wm. G. Breck; Clerk, Miss Mary L. Jacobs; Treasurer, Mrs. Geo. A circular is defined to be a printed letter which is being sent in identical terms to several persons. It does not lose its character as such by writing the name of the addressee or sender therein, nor by the correction of a mere typographical error in writing.

Permissible Additions to Third-Class Matter.—Upon matter of the third-class, or upon the wrapper or envelope enclosing the same, or the tag or label attached thereto, the sender may write his own name, occupation, and residence or business address, preceded by the word "from," and may make marks other than by written or printed words to call attention to any word or passage in the text, and may correct any typographical errors. There may be placed upon the blank leaves or cover of any book, or printed matter of the third-class, a simple manuscript, dedication or inscription not of the nature of a personal correspondence. Upon the wrapper or envelope of third-class matter or the tag or label attached thereto may be printed any matter mailable as third-class, but there must be left on the address side a space sufficient for a legible address and necessary stamps.—(Act of January 20, 1888.)

Fourth-Class Matter—Includes merchandise and samples of merchandise, models, samples of ores, metals, minerals, etc., and any other matter not included in the first, second or third classes, and which is not in its form or nature liable to destroy, deface or otherwise damage the contents of

the mail-bag or harm the person. Postage rate thereon, one cent for each ounce or fractional part thereof.

Permissible Writing or Printing upon or with Fourth-Class Matter.—With a package of fourth-class matter prepaid at the proper rate for that class, the sender may enclose any mailable third-class matter, and may write upon the wrapper or cover thereof, or tag or label accompanying the same, his name, occupation, residence or business address, preceded by the word "from," and any marks, numbers, names or letters for purpose of description, or may print thereon the same, and any printed matter not in the nature of a personal correspondence, but there must be left on the address side or face of the package a space sufficient for a legible address and necessary stamps.—(Act of January 20, 1888.)

The tag or label with the printing or writing authorized thereon, may be attached to the whole package, or separate tags or labels, bearing the same, may be attached to each of one or more articles contained in the package.

The postage to Canada is the same as domestic postage.

The uniform fee for the issue of a postal note is three cents. A postal note will be issued at any money order office, payable at any other money order office for any sum from one cent to four dollars and ninety-nine cents, but not for any sum including a fraction of a cent. No written application for a postal note is required. There is no limit to the number of postal notes that may be issued from the same office on the same day to the same person. A postal note is valid until three months from the last day of the month of issue. The postal note is made payable to bearer, and hence to whomsoever presents it. If a postal note be lost or destroyed, no duplicate can be issued; but duplicate of an invalid note (one not paid within the given time) can be procured.

The fee on any registered matter, domestic or foreign, is fixed at ten cents on each letter or parcel, to be affixed in stamps in addition to the postage. Two or more letters or parcels addressed to or intended for the same person cannot be tied or otherwise fastened together and registered as one.

Special Delivery—A special ten cent stamp affixed to any article of mailable matter in addition to the ordinary postage, insures its delivery by special carrier, immediately upon its arrival at the office of destination, between the hours of 7 a m and 11 p m at free delivery offices, and 7 a m to 7 p m at other offices. But this delivery will only be made within the carrier limit at letter-carrier offices and within one mile of post offices at all other places.

CEMETERIES.

There are six burial places in town—four of which are in the eastern part.

Church Street Grave Yard—This is the oldest burial ground in the town, is well preserved, but it is almost impossible to decipher most of the inscriptions. Among those that can be read are "Nathaniel Dwite" died November, 1711, and Rev. John Woodbridge, first minister of West Springfield, who "fell asleep June 10, 1718." No body has been deposited in these grounds since the beginning of the present century.

Town Hall Cemetery—This is a burying ground lying between Town Hall and Park Street Church and was laid out about 1780. The first burial was that of Solomon Lathrop, 1787.

Meeting House Hill Cemetery —These grounds are owned by the First Church Parish. The first burial in it was in 1808. It contains a soldiers' monument, a brown stone shaft about 20 feet high, bearing inscriptions of thirty soldiers of the 10th Massachusetts regiment.

Catholic Cemetery is located at Mittineague, and although but about twenty years old, several acres of land are already covered with graves.

Artesian and Driven Wells,

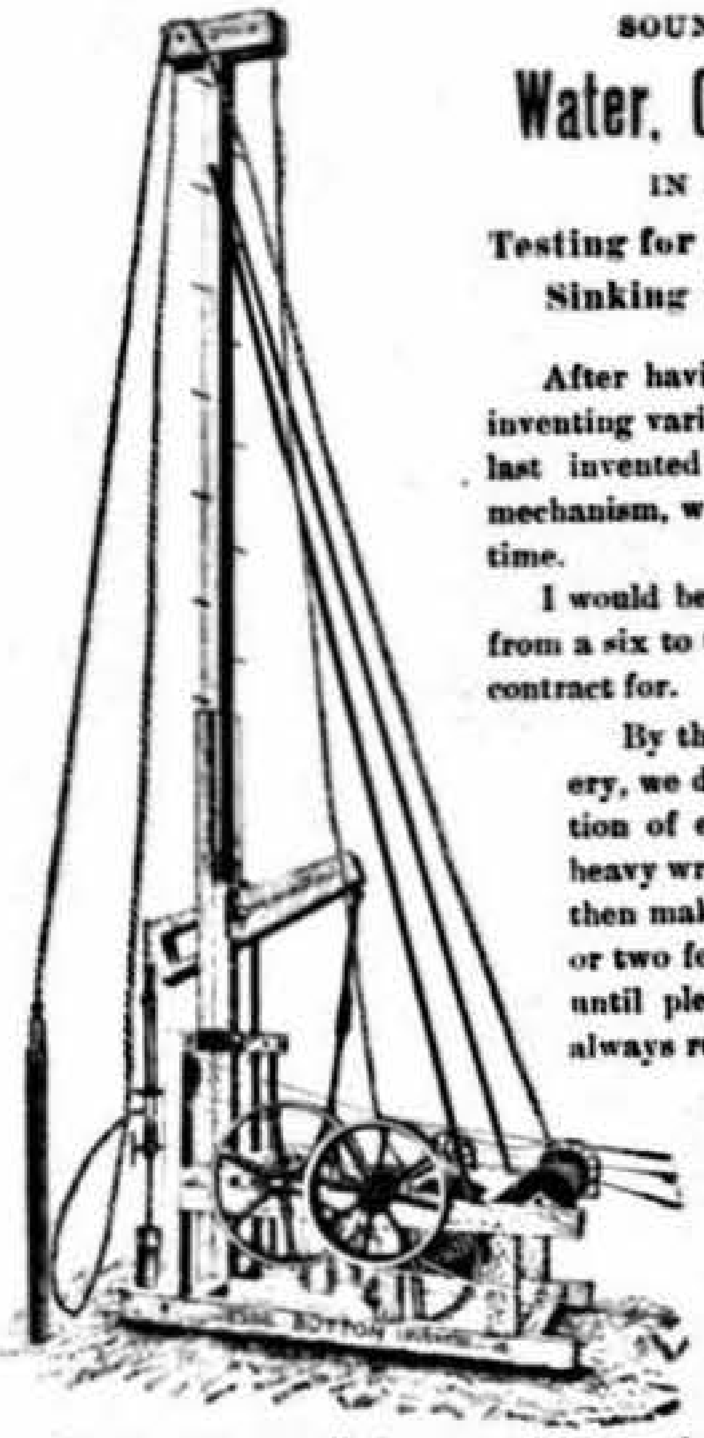
Testing for Foundations for Bridges or Buildings.
Sinking Pipe for Hydraulic Elevator Shafts.



After having had 30 years experience in making and inventing various styles of well sinking machines, I have at last invented one, a most simple and compact piece of mechanism, which will do the work better and in a shorter time.

I would be pleased to give estimates for sinking wells from a six to twelve inch hole to any depth parties wish to contract for.

By the use of our Artesian Well Drilling Machinery, we drill a six inch hole down through any formation of earth, sand, gravel, boulder or rock, using a heavy wrought iron casing until the rock bed is struck, then making a tight connection with this iron tube one or two feet in the rock. We then drill into the rock until plenty of pure cold water is found, which is always running in the seams of the rock. Where the rock is not found we always find a good vein of water in a strata of gravel, which insures pure water. We can always get a good well where it is impossible by any other method.

These wells will never need cleaning out, as nothing can get in from the top or sides. The water is taken directly from the living spring.

We have these wells in successful operation in different states, some of which are flowing There can be no better wells or water than are obtained by drilling into rock until water is reached.

TRADE-MARK.

Patented October 16, 1889.

These Books are made waterproof at binding and corners, and are provided with moistening pad and oil sheets, by the use of which a number of pages can be kept moist and ready for immediate use, DISPENSING ENTIRELY WITH WATER POT, BRUSH AND WET BLOTTERS. The pad is first wet with water, then placed in book, back of twenty or more sheets, and put in press until required for copying, when sheets will be found uniformly and thoroughly moist, and VERY SUSCEPTIBLE TO ANY COPYING INK.

The back of the book being waterproof prevents the moisture from working into the binding or into leaves already copied on, and by similar treatment of corners leaves do not stick together and prevent rapid handling. The paper in these books is of extra strength, so they can be readily handled without tearing.

Send for Circular, or if requested we will have a representative call and show process.

Burleigh Poetical Advertiser.

CIRCULATION 20,000!—20,000! The Best Advertising Medium in the United States.

Published in some of the principal cities of the Union, ranging from 10,000 to 50,000 circulation. Advertising rates furnished on application. **It is the Advertiser and is read by multitudes.**

I'll guarantee they will be read
For novelty if nothing more,
And the masses they will send
Tapping, rapping, at your door.

Correspondence Solicited. Visit the Bard's Parlors. **Office Hours: 10 to 12 A. M., 2 to 4 P. M.**

Books that he is writing will not gather dust
By being laid on the shelf to gather rust.

When but a boy he held the plow,
Chopped the wood and milked the cow.

GEORGE REUBEN BURLEIGH,

POET LAUREATE OF THE WEST, BARD OF NEW ENGLAND, AND PUBLISHER OF BURLEIGH'S POETICAL ADVERTISER.

Mr. Burleigh gives readings from his own works. His famous stage poem is entitled "The Great Thousand Line Poem, From Home to the Poor House and Home Again, or the Trip to the Land of Gold." He will write poems on different subjects for ten cents a line. The Burleigh Poetical Advertiser is recognized by many to be the best advertising medium in the United States.

Old fogyism will have to die,
Poetry advertisements are the cry;
For the people want to read
The advertisements that take the lead.

If at first you try a column,
Then you'll want it by the volume.
The world favors great advance,
At a common "ad." they will not glance.

WASHING MADE EASY WITHOUT BOILING.

Tenney's * Magic * Glycerine * Soap

IS THE BEST SOAP

for the **Laundry, Bath, Toilet, Washing Dishes, Glassware, Paint, Removing Grease Spots, etc.** Will not injure the finest fabrics. Flannels will remain soft and fleecy, and laces and fine goods preserve their freshness if washed with this Soap. It defies all competition, saves time, labor, and wear of clothes. It dispenses with all boiling or scalding. It gives the clothes a clear white appearance, removes all bad odors, and acts as a disinfectant. **FREE FROM ROSIN, SWEET AND PURE.** In every 100 pounds of the tallow we use, there are 8 pounds of glycerine, also a large proportion in the vegetable oils employed. My method is the only way whereby Soap can be manufactured and the glycerine retained in it. As a Bathing, Shaving, and Shampooing Soap it is very fine. It is made of the purest material, and is equal in quality to White Castile. Borax being used in its manufacture, it is excellent for Wounds, Cuts, Sores, Chapped Hands and even Salt Rheum.

KELLEY'S GAUGE-GUIDE FOR MASONS.

This implement is designed for a true, perpendicular guide for bricklayers to work to, at both the inside angle and at the outside corner. They are constructed from three to six feet in length, and each has at its lower end a pin which extends at right angles, while about a foot above this pin is another angularly extended blade, or thin lug, which is vertically adjustable, controlled by an internally applied screw, operated through the hand-wheel.

After the lead has been made the gauges are applied as indicated in the cut, the lower pin or blade being driven between lower courses of the brick, and the blade or lug, operated by the hand-wheel three or four courses above, being forced down to confinement upon a corner brick at such third or fourth higher course. On the longer gauges extra confining blades and operating hand-wheels are provided.

The gauge-guides have straight edges up to which to lay the brick at the corner, and are provided with plumb levels for determining their perpendicular application. A scale is formed upon the metallic straight-edged portions to indicate the distance between the courses.

By use of these gauges at opposite leads which have been started level with each other, the courses may be gauged to the same height at each end of the building; and the opposite corner gauges may also be employed for supporting the line.

Gauges are for sale by the undersigned, who will also negotiate for the sale of state or territorial rights, or licenses. Agents wanted.

Patented Nov. 25, 1890; and other Patents Pending.

SHERMAN KING VAPORIZER CO.

GENTLEMEN:—I have used your vaporizer for an aggravated case of catarrh, with excellent results. In the midwinter of 1888-9, I first tried the Vaporizer, and soon found myself free from catarrh, from which I had suffered for several years, especially in cold weather.

I have since used the Vaporizer during the past winter—one of the worst seasons known for catarrhal complaints—and have been entirely free from catarrh, the first winter season for many years.

Yours truly, CLARK W. BRYAN.
